

Product Description:

JAC–CB885 Synthetic Polymer emulsion specially formulated for carpet backing.

Typical Properties:

Appearance : Clear with Excellent Water Resistance.

Viscosity (cps) : 2,800 – 3,200

Sheen VM1/VM2 @25 (° C)

Solid Content % : 55±2

pH : 4.5-5.5

Specific Gravity (g/cm³) : 1.09 ± 0.01

Applications & Features:

- Specially formulated latex for carpet backing with excellent tuft binding and cut-edge stability.
- High solids for excellent bond & shear strength.
- Easy processability with good flow.

Storage & Stability Conditions:

- Store in closed drums at temperature (5- 35 °C), avoid freezing temperatures & direct heat.
- Stable for 12 months at appropriate storage conditions.
- Keep containers sealed to prevent water evaporation and skin formation.

Please note: -

All statements are based on exact investigations in our laboratories and are gained from practical experience. Thus this can only be an informal advice. We recommend finding out through your own tests whether the product meets the appropriate requirements. Due to the variety of materials on the market and the different processing methods, which are not influenced by us, we cannot guarantee for consequential damages.
